LiquiMedLock™

Compliant Pharmaceutical Packaging

Methadone Bottles

Child Resistant. Tamper Evident. One Cap. No Seal Needed.
Designed with Harm Reduction in Mind.

Bottles With Benefits

Why Choose LiquiMedLock™ Methadone Bottles?

- Child resistant, leakproof cap protects loved ones.
- One-step, click-lock closure.
- Tamper evident band helps track chain of custody.
- Tamper evident band eliminates the need for a seal.

Improve Fill Efficiencies

No More Faulty Seals

Are you facing this problem?

Unlike our bottles, the majority of other products on the market require heat seals or pressure seals for tamper evidence in addition to a cap. If you are one of the people using this type of product, you know it takes 8-9 seconds for the seal to be properly applied. You also know that seals have a high failure rate. You are then aware that you have to remove each cap after the seal has been applied to ensure it was done correctly.

Where does this lead you? It leads you to spend more money on additional packaging components and labour. This equates to wasted time, resources, and a great deal of frustration.

We have an easy solution.

How can we solve this problem for you?

NO SEALS ARE NEEDED!

Our bottles use caps with a unique, one-step, click-lock closure system that eliminates the need for a seal. The outer cap provides the child resistant portion of the closure in compliance with health regulations for child safety.

The inner layer of the cap has a leakproof valve with a specialized tamper evident band that breaks upon first open. This makes batch filling far easier and efficient with less physical strain. Once the bottle is filled, simply turn the cap until you hear it engage with a click. That's it! Easy to close. Easy to open. Easy to trust.

Unlike bottles that use seals, our failure rate is almost non-existent. This means no extra orders of caps are necessary. In addition, our bottles and caps come together in a single box to streamline the ordering process.

Struggling with bottle disposal? Ask us about our **BOTTLE SHREDDERS**.
